### CLEAN AND BEAUTIFUL

Kirei Board is the new face of contemporary design: A beautiful natural material made with renewable, non-toxic components

Strong, lightweight and environmentally friendly, Kirei Board is an excellent substitute for wood in nearly any finished product.

Ideal uses for Kirei include:

- Cabinetry
- Furniture
- Paneling
- Finished products
- Store displays
- Restaurant interiors
- Interior wall coverings
- Office dividers
- Home decoration
- Flooring

#### ENVIRONMENTAL BENEFITS

Kirei Board reduces forest clear-cutting, air pollution and landfill use. The sorghum stalks used in the manufacture of Kirei Board are a rapidly renewable resource left after the edible portion of the plant is harvested.

#### REDUCED WASTE

Until now, these stalks have been discarded or burned, adding to landfill waste and pollution. Kirei Board helps reduce this waste and ease deforestation by substituting for wood.

#### ZERO FORMALDEHYDE

In addition, Kirei Board is made using a non-toxic adhesive that does not contain formalin, helping reduce toxic formaldehyde VOC's released into the ambient indoor air.

#### GREEN BUILDING

Kirei Board can be an excellent way to help your projects qualify for LEED credit for environmentally friendly construction.

### Features and Benefits of Sapeli Hardwood Lumber

- Sapeli is excellent for your next mahogany project
- Sapeli has good color consistency, color ranging from a deep brown to red
- Sapeli is plain sliced which produces a grain pattern suitable for running mouldings
- Sapeli is available in good board widths and lengths

## WESTERN RED ALDER

**Alder is a close or fine grained wood similar to Cherry, Birch and Maple. It is used in both solid wood and veneer applications. Alder's fine homogeneous grain structure and the light uniform color of both heartwood and sapwood make it easy to form, fasten & finish. This light and uniform color is both easy to stain and highly valued in its natural state!!!**
