## FIRE RATED MDF

FR MDF was developed specifically to meet the requirements of Class 1 fire retardation in accordance with UL Flame rating, while delivering performance and environmental features previously unavailable in an FR material.

Applications: FR MDF allows users to meet stricter building codes, reducing liability exposure and providing safer work places and living environments. It is the material choice for:

- Fire rated doors
- Raised floors
- Wall systems
- Elevator cabs
- Furniture and cabinetry
- Shelving and counter tops
- Mouldings
- Architectural millwork

## Any way you cut it – you retain strong, vibrant colors.

Spectratech Color MDF offers all the benefits of Great Lakes MDF's Premium products with intense "color to the core" for a wide variety of new creative possibilities.

Spectratech Color MDF offers full-depth tinting of industrial panels for furniture, store fixtures, interiors and other commercial applications. This allows for shaping and cutting of the MDF (edges can be mitered, for example) while retaining the vibrant color throughout.

Since the color is added at the start of the manufacturing process, Spectratech Color MDF retains the strength of conventional MDF panels and adds brilliant color.

Lasting beauty: specially designed light-stable colorants were chosen to minimize the effects of sunlight and UV radiation.\* Spectratech Color MDF is made to be touched up and refurbished. Scratches can be sanded out and a finish re-applied.

Full-depth color eliminates the need for skin-deep finishes such as stains and laminates. When you apply a clear finish such as urethane, lacquer or clear powder coat, the colors become vivid and beautiful.

\* Care should be taken to select a clear finish that will provide protection from these elements.

### Available colors:

*In response to customer requests, we've added a new color to our lineup: an attractive warm grey*

### The Great Lakes MDF difference

We have a leaner, faster, more flexible operation capable of fulfilling custom orders and meeting the shorter lead times.

We make an easily machined board from washed, green chips that features outstanding strength, consistency and dimensional stability. Our board provides an excellent substrate with a smooth face and tight edge.

### A Quality Appearance That Lasts for Years

Spectratech Color MDF offers many creative possibilities for furniture, cabinetry, displays, exhibits and store fixtures.

Color MDF materials give wood product manufacturers an ideal alternative and provide a range of colorful visual effects.

### Product Specifications

- **Product Selection**

Available in standard thicknesses ( $\frac{7}{16}$ " to 2") in a variety of panel sizes up to 5' x 16'.

- **How to Fasten**

Fasten using screws with parallel thread, and a drilled pilot hole should always be used. Do not fasten within 2½" of a corner or 1" from any edge.

- **Identification**

Easily recognized by the unit identification tag that accompanies every unit.

- **How to Specify**

To specify Great Lakes Spectratech Color MDF, ask for premium-grade MDF meeting ANSI 208.2 standards.

#### Physical Properties of Premium MDF

Property	Units	$\frac{7}{16}$ " to 1"	1 ½" to 2"
Density	lbs./FT <sup>3</sup>	46	44
Internal Bond	PSI	90	90
MOR	PSI	3,500	2,500
MOE	PSI	350,000	350,000
Screw Hold – Face	lbs.	250	225
Screw Hold – Edge	lbs.	200	200
Thickness Swell	%	10	10
Moisture Content	%	6-9	6-9
Linear Expansion	%	0.3	0.3

Please note that, because this is a natural wood product, the steam injected board may exhibit a mottled or burlled look.

Check out our Web site at [www.greatlakesmdf.com](http://www.greatlakesmdf.com) for more information and to view a list of Spectratech distributors in your area. Ask your local distributor for a sample of **Spectratech Color MDF**.

# AETNA PLYWOOD IS NOW FSC CERTIFIED

Dear Customers,

We would like to inform you that Aetna Plywood is now Forest Stewardship Council (FSC) Certified. Our certification number is: SW-COC-1973

## What is FSC?

The Forest Stewardship Council is an independent, non-profit organization that promotes the responsible management of the world's working forests through the development of forest management standards, a voluntary certification system, and trademarks that provide recognition and value to products bearing the FSC label in the marketplace.

Many LEED projects can have these requirements met by using FSC products.

## We stock the following FSC items.

They are all manufactured using a  
non-urea formaldehyde glue, Pure Bond

**Russian Birch is hard to find.  
We have many items in stock!**

## RUSSIAN BIRCH

### 100% Birch Panel

Baltic Birch is an All-Birch plywood panel from Russia. The color of panels is carefully selected to provide a deep white, uniform pattern in order to meet the requirements of elite furniture manufacturers. The panel is made with many plies (ex. 18mm has 13 plies.) This provides a unique combination of strength, flexibility, and a perfect edge.

Due to a very warm winter in Russia, there is a shortage in logs for the Birch panel. Also, there are many other economic factors that are adding up to a shortage of supply coming into the United States. This of course has created large price increases.

## SPECIALS

SPECIALS	ITEM	UNIT SIZE	FULL UNITS

### Baltic Birch Veneer Grade Summary

**Grade B** This is a selected one-piece face, which is generally light and even in color. Some very small, closed pin knots may be allowed, as well as some brown streaks. No patches, voids, or mineral streaks are allowed. The surface is well sanded.

**Grade BB** This is a one-piece face, which is generally light and even in color. Occasional pin knots and mineral streaking is allowed. All open knots and defects other than those allowed in grade B have been cut out and replaced with oval patches. The patch veneer is the same grade and specie, and is typically of the same color. The surface is sanded.

**Grade CP** This is a face that has been graded out from BB for small defects and mineral streaking. CP typically has more patches than grade BB that may not always be matched for color. Some splits of less than 0.5mm are allowed. The surface is sanded.

**Pricing good through July 31, 2007 as supplies last.**
