Russian Birch is hard to find.
We have many items in stock!

PLYWOOD

RUSSIAN BIRCH

100% Birch Panel

Baltic Birch is an All-Birch plywood panel from Russia. The color of panels is carefully selected to provide a deep white, uniform pattern in order to meet the requirements of elite furniture manufacturers. The panel is made with many plies (ex. 18mm has 13 plies.) This provides a unique combination of strength, flexibility, and a perfect edge.

Due to a very warm winter in Russia, there is a shortage in logs for the Birch panel. Also, there are many other economic factors that are adding up to a shortage of supply coming into the United States. This of course has created large price increases.

SPECIALS

SPECIALS	ITEM	UNIT SIZE	FULL UNITS
61 68 119	12mm 5 x 5 Russian Birch B/BB	33	\$ 29.25 ea.

61 72 119	18mm 5 x 5 Russian Birch B/BB	22	\$ 48.25

Baltic Birch Veneer Grade Summary

Grade B This is a selected one-piece face, which is generally light and even in color. Some very small, closed pin knots may be allowed, as well as some brown streaks. No patches, voids, or mineral streaks are allowed. The surface is well sanded.

Grade BB This is a one-piece face, which is generally light and even in color. Occasional pin knots and mineral streaking is allowed. All open knots and defects other than those allowed in grade B have been cut out and replaced with oval patches. The patch veneer is the same grade and specie, and is typically of the same color. The surface is sanded.

Grade CP This is a face that has been graded out from BB for small defects and mineral streaking. CP typically has more patches than grade BB that may not always be matched for color. Some splits of less than 0.5mm are allowed. The surface is sanded.

Pricing good through January 31, 2008 as supplies last.

Any way you cut it – you retain strong, vibrant colors.

Spectratech Color MDF offers all the benefits of Great Lakes MDF's Premium products with intense "color to the core" for a wide variety of new creative possibilities.

Spectratech Color MDF offers full-depth tinting of industrial panels for furniture, store fixtures, interiors and other commercial applications. This allows for shaping and cutting of the MDF (edges can be mitered, for example) while retaining the vibrant color throughout.

Since the color is added at the start of the manufacturing process, Spectratech Color MDF retains the strength of conventional MDF panels and adds brilliant color.

Lasting beauty: specially designed light-stable colorants were chosen to minimize the effects of sunlight and UV radiation.* Spectratech Color MDF is made to be touched up and refurbished. Scratches can be sanded out and a finish re-applied.

Full-depth color eliminates the need for skin-deep finishes such as stains and laminates. When you apply a clear finish such as urethane, lacquer or clear powder coat, the colors become vivid and beautiful.

* Care should be taken to select a clear finish that will provide protection from these elements.

In response to customer requests, we've added a new color to our lineup: an attractive warm grey

A Breath of Fresh MDF

New from Great Lakes MDF – technology meets ecology with Cleantech Green MDF:

- Employs EcoBind™ Resin Technology
- Contains no added urea formaldehyde resin
- Is available in standard sizes – in stock
- Is available in Spectratech Color MDF with 9 vibrant colors
- Is available in Fahrentech Fire Rated MDF with a Class I UL rating
- Is CARB Compliant
- Meets all Global Emission Requirements

Aetna Plywood, your complete source for Fire-rated Duraflake Particleboard!

Basic Use: Duraflake FR is a class 1 rated fire retardant particleboard, suitable for a variety of industrial and commercial building applications where stringent building codes and public safety requirements are a factor. It can be drilled, routed, bullnosed, beveled and precision-machined. It is used as a substrate for wood veneers, high and low pressure laminates, as well as thin roll laminates. Laminated panels are then used in a wide variety of applications such as malls, offices, commercial case goods, hospitals, hotels, restaurants and any application where fire retardancy is a concern.

Composition and Materials: Duraflake FR is made from western softwood particles and highly effective fire retardant chemicals bonded with special formulas of resins and waxes.

WITH OVER 100,000 SQUARE FEET OF FR IN STOCK, AETNA'S GOT YOU COVERED.
