Aetna stocks a variety of MDF grades to give you “the Right Tool for the Right Job”

SUPERIOR CUSTOM MDF | medium density fiberboard

Superior MDF panels are the medium density fiberboard products of choice when looking for optimal quality and consistency in the most demanding of applications.

Superior Custom is available raw or finished with your choice of thermally fused melamine design in a wide variety of panels thicknesses and dimensions.

Grade	Superior Custom MDF
Thickness	1/2" - 1 1/8"
Density (lb./ft. ³)	41
Internal Bond (psi)	95
MOR (psi)	2500
MOE (psi)	300,000
Face Screw Holding (lbs.)	215
Edge Screw Holding (lbs.)*	210
Moisture Content (%)	5-7
Thickness Swell (%)	8

Sanded Finish = 150 grit

Thickness Tolerance = +/- 0.005 in.

*ESW specifications do not apply for products <5/8" in thickness

Physical Properties:

These are typical values representing production at the Sault Ste. Marie facility. Flakeboard will meet or exceed the minimum standards set out in ANSI A208.2 2002. The values listed are the result of tests conducted in accordance with ASTM D 1037-99. "Standard Methods of Evaluating the Properties of Wood Based Fiber and Particle Panel Materials." Specific design applications, technical data, product and thickness information is available upon request.

Complies with CPA EPPS 3-08 and CCR 93180.2(a) (CARB Composite Wood ATCM Phase 1 Formaldehyde Emission Limits)

CPA 3-08 Specification
California ARB Approved
Third Party Certifier TPC-1

Aetna stocks a variety of MDF grades to give you “the Right Tool for the Right Job”

PREMIER® MDF | medium density fiberboard

DISCOVER THE PREMIER® PERFORMANCE DIFFERENCE

For outstanding performance, durability and consistency in your moulding and millwork applications, Flakeboard's Premier® MDF offers everything you need. Our advanced refining processes and high quality wood furnish, offer excellent surface qualities for deep, detailed profiling of cabinets, fixtures and furniture components.

Choose from:

- Premier® MDF, our standard grade that's ideal for most industrial uses including cabinets, fixtures and furniture components
- Premier® Plus MDF, an increased internal bond makes this grade ideal intricate machining and is a popular choice for retail and commercial displays
- Premier® Lite MDF, a lighter weight and cost-effective alternative for detailed profiling and moulding manufacturers
- Premier® Plus MR MDF, a moisture resistant panel offering for high humidity applications such as kitchen, bath and laboratory cabinetry
- Specialty options such as High Density, cut-to-size and shelving are available upon request.

BEADED PANELS

The look of fine tongue and groove woodwork with the installation ease of a plywood sheet. That's the beauty of Columbia Forest Products' Beaded Panels. Check out the surface and you'll find the lasting beauty of Columbia hardwood veneers...and that's no illusion.

Good looks and installation ease are just the beginning. Columbia's Beaded Panels feature a wide variety of decorative hardwood faces and backs machined with a 1-1/2" or 3" on-center beaded groove pattern. The cutting heads are calibrated to ensure pattern uniformity across the entire sheet for a convincing illusion of tongue and groove woodwork that matches any existing species used. And since Beaded Panels are unfinished, close color matching with existing molding and millwork is possible. You can finish them or use them in painted applications.

Beaded Panels can be used for wall paneling, wainscoting, cabinet doors, cabinet backers or anywhere you wish to replicate the tongue and grooved appearance of fine woodwork.

**Russian Birch is hard to find.
We have many items in stock!**

PLYWOOD

RUSSIAN BIRCH

100% Birch Panel

Baltic Birch is an All-Birch plywood panel from Russia. The color of panels is carefully selected to provide a deep white, uniform pattern in order to meet the requirements of elite furniture manufacturers. The panel is made with many plies (ex. 18mm has 13 plies.) This provides a unique combination of strength, flexibility, and a perfect edge.

Due to a very warm winter in Russia, there is a shortage in logs for the Birch panel. Also, there are many other economic factors that are adding up to a shortage of supply coming into the United States. This of course has created large price increases.

Baltic Birch Veneer Grade Summary

Grade B This is a selected one-piece face, which is generally light and even in color. Some very small, closed pin knots may be allowed, as well as some brown streaks. No patches, voids, or mineral streaks are allowed. The surface is well sanded.

Grade BB This is a one-piece face, which is generally light and even in color. Occasional pin knots and mineral streaking is allowed. All open knots and defects other than those allowed in grade B have been cut out and replaced with oval patches. The patch veneer is the same grade and specie, and is typically of the same color. The surface is sanded.

Grade CP This is a face that has been graded out from BB for small defects and mineral streaking. CP typically has more patches than grade BB that may not always be matched for color. Some splits of less than 0.5mm are allowed. The surface is sanded.

Pricing good through April 30, 2009 as supplies last.

SUSTAINABLE DESIGN FIBERBOARD

The future of engineered composites...today!
 From SierraPine – the leader in composite panel innovation

Sustainable Design Fiberboard (SDF) from SierraPine is the result of proven expertise in the manufacturing of sustainable, medium density fiberboard composites for nearly two decades. All SierraPine SDF products feature formaldehyde-free binder systems, 100 percent recycled wood fiber and are manufactured in North America. SierraPine SDF products are widely distributed throughout the U.S. and Canada.

NOW YOU SEE IT — NOW YOU DON'T

WILSONART BRAND MARKER BOARD LAMINATE

- Wilsonart Brand Marker Board Laminate is the standard marker board used by many of the office furniture manufacturers.
- Marker Board Laminate **requires no special tools**, unlike epoxy or porcelain products and it **weighs much less**. Easier to work and fabricate than other products
- Marker Board Laminate is **much less expensive** than porcelain products. You can use conventional contact adhesive to adhere to your substrates
- Marker Board Laminate **will eliminate potentially hazardous chalk dust and is GREENGUARD Certified**.
- The finish is unique for this application, much better than gloss HPL, or melamine, or hardboard. **You will see No Ghosting and NO Halos as with many competing options.**
- You can use Marker Board Laminate in office furniture systems, corporate meeting rooms, hospitals, day care centers, schools, and planning centers.
