### CLEAN AND BEAUTIFUL

Kirei Board is the new face of contemporary design: A beautiful natural material made with renewable, non-toxic components

Strong, lightweight and environmentally friendly, Kirei Board is an excellent substitute for wood in nearly any finished product.

Ideal uses for Kirei include:

- Cabinetry
- Furniture
- Paneling
- Finished products
- Store displays
- Restaurant interiors
- Interior wall coverings
- Office dividers
- Home decoration
- Flooring

#### ENVIRONMENTAL BENEFITS

Kirei Board reduces forest clear-cutting, air pollution and landfill use. The sorghum stalks used in the manufacture of Kirei Board are a rapidly renewable resource left after the edible portion of the plant is harvested.

#### REDUCED WASTE

Until now, these stalks have been discarded or burned, adding to landfill waste and pollution. Kirei Board helps reduce this waste and ease deforestation by substituting for wood.

#### ZERO FORMALDEHYDE

In addition, Kirei Board is made using a non-toxic adhesive that does not contain formalin, helping reduce toxic formaldehyde VOC's released into the ambient indoor air.

#### GREEN BUILDING

Kirei Board can be an excellent way to help your projects qualify for LEED credit for environmentally friendly construction.

# Premium Tempered Hardboard

This hardboard is a fully-tempered board and smooth on two sides. It is very dense and rigid, making it ideal for painting and any purpose where you would want a strong board.

# Why PolyBak?

**Because it's the backer that will save you money *without* sacrificing performance.**

- Polybak** is a Kraft linerboard balancing backer sheet priced to compete with similar products on the market, but with crucial differences (thanks to **proprietary polymer technology**) that provide **indefinite shelf life** and enhance the performance of the finished product.
- Polybak** is the only product of its type that has a **Class A flame spread rating** and contains **no added Formaldehyde**.
- Polybak** is highly **moisture resistant**, improving substrate balance and greatly reducing the potential for product warping.
- Polybak** is **extremely flexible**, lending itself to a greater variety of applications and eliminating waste through breakage.
