PLYWOOD

AETNA PLYWOOD IS FSC CERTIFIED

Dear Customers,

We would like to inform you that Aetna Plywood is now Forest Stewardship Council (FSC) Certified. Our certification number is: SW-COC-1973

What is FSC?

The Forest Stewardship Council is an independent, non-profit organization that promotes the responsible management of the world’s working forests through the development of forest management standards, a voluntary certification system, and trademarks that provide recognition and value to products bearing the FSC label in the marketplace.

Many LEED projects can have these requirements met by using FSC products.

The following are stock FSC items in Hardwood and Softwood Plywood

All items are manufactured using a non-urea formaldehyde glue

CODE	ITEM

eLite™ MDF | medium density fiberboard

passion
for panels®

THE ULTRA LIGHT MDF THAT ACTUALLY PERFORMS

This ultra light MDF panel is the only true North American board that rivals the performance of domestic and imported ultra light MDF suppliers. Manufactured using our very own patented technology, eLite™ MDF meets all the performance, quality and environmental standards that you have come to expect from Flakeboard MDF panels.

eLite™ MDF was developed and produced in North America to provide:

- A domestic supply source that has the quality of imported ultra light, and domestically produced standard MDF products
- A panel that is 30% lighter than standard MDF
- Freight savings, short lead-time, labor benefits and extended tool life
- A CARB Phase 1 Compliant and EPP Certified ultra light MDF panel

eLite™ MDF Product Specification (Eugene, OR) – Press size 4' x 16'

Grade	eLite™ MDF

Why PolyBak?

Because it's the backer that will save you money *without* sacrificing performance.

Polybak is a Kraft linerboard balancing backer sheet priced to compete with similar products on the market, but with crucial differences (thanks to proprietary polymer technology) that provide **indefinite shelf life** and enhance the performance of the finished product.

Polybak is the only product of its type that contains **no added Formaldehyde**.

Polybak is highly **moisture resistant**, improving substrate balance and greatly reducing the potential for product warping.

Polybak is extremely flexible, lending itself to a greater variety of applications and eliminating waste through breakage.

"Try PolyBak and you'll never switch back"
