AETNA PLYWOOD IS STOCKING APPLEPLY®

ApplePly® is a premium quality veneer core panel constructed from uniform laminations of solid grade 1/16" Alder and Birch. This all hardwood core produces a strong, lightweight panel with a minimum number of voids and a naturally attractive edge. ApplePly is available from 1/4" through 1-1/4" in thickness and 48" X 96" and 48" X 120" panels.

ApplePly's uniformly thin plies of light colored alder and birch give it a visually attractive edge. The strong pattern of the edge is often used as a design element.

APPLEPLY® IS FSC CERTIFIED

ATTRACTIVE EDGES

Uniformly thin core veneers laminated at right angles produces an attractive visual edge that is often used as a primary design element in furniture, fixtures and architectural installations. ApplePly® is also popular for use as drawer sides because of its appearance when left unbanded. Alternating end grain and edge grain absorbs stain and finish at different rates, producing a pleasing light and dark layered effect.

IMPROVED MACHINABILITY

Because ApplePly® is made from low density hardwood veneers, and because it has few voids, it machines beautifully without tearing or fuzzing effect. For example, bull nosed draw edges with Appleply® are a popular application
