

To install the newly designed **Quickfit Expando System 6,** these are the only tools you'll need.

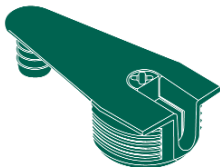

Aetna Plywood and Titus® International

present the newly designed Expando System 6 Fastener. It's not only the most user friendly item on the market, but the screwdriver can now go in at an angle!

It features the new **Eccentric Cam!**

There's no need to use an insertion ram or a hammer to install. Simply press the housing in with your fingers.

As the cam is turned the housing expands, locking it into the board and also locking the two panels together. Couple the new fastener with the Quickfit Dowel, and the labor savings will virtually pay for the fittings!

As a leading distributor to the cabinet and furniture industries, Aetna Plywood can offer you a full selection of hardware including fasteners, audio storage, hinges, slides, abrasives, adhesives, lazy susans and much more. All from quality names including Titus, Salice, Mepla-Alfit, Dynaslide, U.S. Futaba, S&G Specialty Fasteners, 3M, Canplast, Edgemate, and Hettich.

Contact Aetna for more information or samples of the new Titus fitting or any of your hardware needs.
