

EOS_{cu} (Cupron Enhanced EOS) is a Preventive|Biocidal Surface™. It's the only synthetic hard surface EPA-registered for public-health claims, continuously killing harmful bacteria* within 2 hours of exposure.

With the rise of hospital-acquired infections (HAIs) and antibiotic-resistant microbes, new infection control methods are needed. A Preventive|Biocidal Surface™ is the answer. It's the only product that prevents and protects by actively killing bacteria, even after repeated contamination. It offers another layer of protection to help combat infections in any setting.
