

Birch Lumber

DESCRIPTION

Birch has a white sapwood and light reddish brown heartwood. The wood is generally straight-grained with a fine, uniform texture and is generally characterized by a plain, often curly or wavy, pattern.

WORKING PROPERTIES

The wood works fairly easily, glues well with care, takes stain extremely well and nails and screws satisfactorily where pre-boring is advised. It dries rather slowly with little degradation, but it has moderately high shrinkage so it is susceptible to movement in performance.

PHYSICAL PROPERTIES

Birch is a heavy wood and is hard and strong. It has very good benign properties with good crushing strength and shock resistance.

MAIN USES

Furniture, millwork and paneling, doors, flooring, kitchen cabinets, turnings and toys.
