

Poplar Lumber

Poplar remains one of the most used species for painted cabinets and furniture.

Be sure to ask us about our new 4/4 White One Face Poplar in Maywood!

GENERAL DESCRIPTION

The sapwood is creamy white and may be streaked. The heartwood varies from pale yellowish-brown to olive green. The green color in the heartwood will tend to darken on exposure to light and turn brown. The wood has a medium-to-fine texture and is straight-grained.

WORKING PROPERTIES

It is a versatile wood that is easy to machine, plane, turn, glue, and bore. It dries easily with minimal movement and has little tendency to split when nailed. It takes and holds paint, enamel, and stain exceptionally well.

AVAILABILITY

Very widely available.

MAIN USES

Light construction, furniture, kitchen cabinets, doors, paneling, moulding and millwork, edge-glued panels, turnings, and carvings.

AVAILABLE SIZES

4/4-12/4
