

Cherry Lumber

Aetna Building Solutions is your source for Cherry Lumber!

DISTRIBUTION

Throughout Midwestern and Eastern U.S. Main commercial areas: Pennsylvania, Virginia, West Virginia, and New York.

GENERAL DESCRIPTION

The heartwood of cherry varies from rich red to reddish brown and will darken with age and on exposure to light. In contrast, the sapwood is creamy white. The wood has a straight grain, a fine, uniform, satiny and smooth texture, and naturally may contain brown pith flecks and small gum pockets.

WORKING PROPERTIES

Cherry is easy to machine, nails and glues well, and when sanded and stained, it produces an excellent, smooth finish. It dries fairly quickly with moderately high shrinkage, but dimensionally is stable after kiln-drying.

PHYSICAL PROPERTIES

Cherry is of medium density with good bending properties, has low stiffness, and medium strength and shock resistance.

AVAILABILITY

Readily available.

MAIN USES

Fine furniture and cabinet making, moulding and millwork, kitchen cabinets, paneling, flooring, doors, boat interiors, musical instruments, turnings, and carvings.
