

## Columbia Forest Products UV Finished Hardwood Maple Plywood

Lose the time, material, equipment and productivity costs associated with finishing your own panels – and give your customers a beautifully tough surface that stands up to Covid-19 cleansers and disinfectants!

Columbia's UV Wood panels feature a durable, clear, epoxy acrylic coat that enhances the warmth and beauty of their hardwood veneers. This tough finish is ideal for cabinet interiors and exposed outer faces.

You'll appreciate the savings of pre-finished UV Wood panels, which eliminate the need for spray coating time, talent, material and equipment. And you'll be providing your customers with a real wood alternative to synthetic, printed interiors – an upgrade to standard boxes you can offer at a competitive price!

UV Wood resists scratches, chips and the effects of solvent wipe down. Plus, it's available in Ultra Low, Low, Satin, Medium and High Gloss options, can be finished on one or two sides, and is available on any core, grade and species combination.

### Features and Benefits

- Consistent & beautiful finish resists scratches and chips and stands up to disinfectants and other antimicrobial cleansers – even those with bleach.
- New Ultra Low Gloss sheen option satisfies today's more natural design preferences.
- Finished surface reduces labor time and cost, increasing productivity and efficiency.
- Real wood alternative to melamine box interiors or those using low basis weight papers.
- Overspray and other installation messes can be easily wiped up with acetone.
- UV Wood panels are balanced and will stay flatter than a melamine one-side panel.
- UV finished surface don't add to your shop's VOC emissions limits.
- Available on veneer core, MDF and particleboard cores in a variety of thicknesses and any hardwood face and back combinations for numerous design options.
- Made on advanced lines in Columbia's mills in Oregon, Ontario and Virginia.
