Technical specifications

Slider S10 is a flexible system that can be adapted to the internal width of the cabinet (**LI**) with a minimum of 860 mm (33 - 7/8") to a maximum of 2400 mm (94 - 1/2").

The handle must be positioned at a minimum 10 mm (3/8") from the edge of the door and a maximum of one third of its width (**TL**).

The maximum overlay on the side panel is 25 mm (1").

Slider S10

The cabinet has to be constructed so that the bottom panel of the base unit, or the top panel of the wall unit is sufficiently rigid to prevent it from bending. For this reason, some reinforcement is always recommended **1**.
