

Baltic Birch Plywood

Baltic Birch plywood, also known as Russian Birch plywood, is a high-quality panel product with a core unlike traditional plywood.

- The inner plies are 1.1 to 1.5mm thick solid birch veneer cross-banded and laminated with interior/exterior grade adhesives.
- Virtually void free and manufactured with uniformly thick veneer wood.
- Multi-ply construction offers aesthetically pleasing faces and edges.
- Panels are stable, strong and have exceptional machining properties.

Applications

Because of the quality of this material, there are numerous uses for Baltic Birch that include cabinets, furniture, flooring, drawer sides, packaging, industrial components, toys, store fixtures, and many other woodworking projects.
