

Choose confidently.
Design boldly.
Use fearlessly.

ÆON™ is in it.

3X

MORE DURABLE — BUILT IN*

ÆON™ Technology transforms ordinary surfaces into stronger, more durable surfaces with extraordinary performance for high-traffic, high-use spaces. All while invisibly protecting your beautiful designs long into the future.

 **Wilsonart®**

HPL

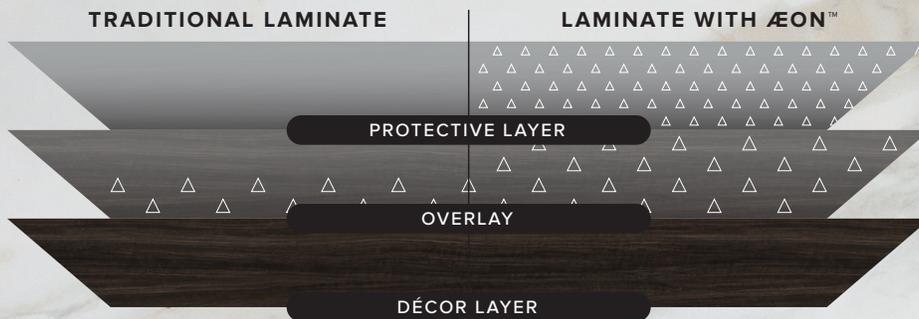

*Up to three times compared to competitive laminates with a similar finish.

ÆON™ Technology: The science of superior performance.

Our proprietary ÆON™ Technology is not a coating or finish. It's a way of making laminate more powerful by infusing fine and accurately placed aluminum oxide particles directly into our melamine, providing invisible, permanent, always-there protection.

- **Always-on force field** for maximum performance.
- **Clearer designs** that look better when new and well into the future.

Make it 3X more ready for anything.*

Wilsonart® HPL surfaces with ÆON™ Technology are **3X more durable*** than competitive laminates, perfect for high-traffic, high-use applications. Keep your design looking like new, longer. More possibilities. More beauty. More years. All with more confidence.

- **3X** more wear resistant*
- **3X** more scuff resistant*
- **3X** more scratch resistant*

3X the peace of mind, and
3X the confidence built in.*

After all, it's forever protected by ÆON™
