## DISCOVER INCREDIBLE DURABILITY.

Thinscape is engineered by fusing papers and resins under high heat and pressure to produce a sleek, durable surface. The result? A 1/2-inch composite crafted to resist impact, abrasions, scratches, and moisture in high-use areas. Plus, stain resistance and a no-seal guarantee mean maintenance is effortless.

## EASY TO FABRICATE. EASY TO INSTALL.

Thinscape is lightweight, self-supporting, and can be easily fabricated with simple woodworking tools. No substrate is needed, so installing the composite top also takes far less time than other materials — and is completed in fewer steps.
